Telefon : 015204045656

The disposal of an old car is a big challenge in most cases. If the vehicle is no longer ready to drive, you have to organize appropriate transport to the scrapyard. In many cases there are additional costs to dispose of the scrap car in accordance with the legal requirements. You will not be confronted with these problems in the first place at the city car recycling. We pick up the vehicle, regardless of whether it is a car, transport or motorcycle, directly from you and dispose of it free of charge. We work with no hidden costs. This is because the financing is secured through the raw material of the vehicle. A double rip-off is impossible with us. At the same time, we will create a certificate of destruction so that you can prove that your automobile has been disposed of in accordance with regulations.
