Papertech Germany GmbH is a manufacturer of high-quality paper straws, which are made with the best available components. They are the eco-friendly alternative to plastic straws as they completely and biologically decompose in a short time. Organic straws are not only ecologically sensitive, but also stable and aesthetic and ensure that the mountain of plastic waste is significantly reduced. The opaque paper drinking straws from Paper Tech Germany meet the highest ecological requirements and help to avoid plastic waste. They last long enough to comfortably enjoy a drink. You may contact us for more information.
