

Smart Hospital Maintenance

Billwerder Neuer Deich 12
Hamburg 20539

Telefon : 4052471242

Smart Hospital Maintenance (SHM) is a software solution for healthcare and hospital equipment maintenance and management. SHM offers a range of modules that enable its clients to plan, schedule, track, and optimize their equipment maintenance activities. The software is a Computer-Aided Maintenance Management (CMMS) system, which automates and streamlines maintenance processes. SHM Software is available as a cloud service, a mobile app, and can be installed on the client's server. SHM Software is already implemented in healthcare facilities across the world.
